Does QuantumScape manufacture lithium-metal battery separators?

SAN JOSE, Calif., December 05, 2024 -- (BUSINESS WIRE)-- QuantumScape Corporation (NYSE: QS), a leader in solid-state lithium-metal battery technology, today announced that next-generation heat treatment equipment for its separator production process, Cobra, has been developed, delivered, installed and released for initial separator processing.

What is QuantumScape & how does it work?

QuantumScape is on a mission to revolutionize energy storage to enable a sustainable future. The company's next-generation solid-state lithium-metal battery technology is designed to enable greater energy density, faster charging and enhanced safety to support the transition away from legacy energy sources toward a lower carbon future.

Will QuantumScape be able to develop EV batteries?

According to the company, it has begun low-volume production of its initial B-sample cells, which will soon be sent to automotive partners for EV implementation testing. The decade-plus journey of QuantumScape (\$QS) and its quest to develop and scale energy-dense solid-state batteries reached another important milestone today.

What's new with QuantumScape?

With today's announcement, QuantumScape has taken delivery, installed and released for initial separator processing key equipment for its advanced separator manufacturing process, Cobra. Begin low-volume QSE-5 prototype production.

What is a solid-state lithium-metal battery?

A: A solid-state lithium-metal battery is a battery that replaces the polymer separator used in conventional lithium-ion batteries with a solid-state separator. The replacement of the separator enables the carbon or silicon anode used in conventional lithium-ion batteries to be replaced with a lithium-metal anode.

QuantumScape Co. NYSE: QS is a battery technology company that has been developing its next-generation solid-state lithium-metal electric vehicle (EV) battery for nearly 15 years. The auto/tires/trucks sector company is in its final stages before commercialization commences in 2025, when they start shipping their commercial batteries to start generating ...
