However, in the past decade, Panama's climate patterns have changed significantly (Ministerio de Ambiente Panama, 2021). It is important to assess the potential impact of these changes on existing and planned energy infrastructure, among other aspects. Without measures to increase the energy sector's resilience to climate

PANAMA CITY/HOUSTON, Oct 29 (Reuters) - The Panama Canal aims to regain vessel traffic carrying U.S. liquefied natural gas to Asia as demand in that market rises and a new reservation system allows shippers to lock in slots, following a 65% decline in the transit of its second-most important segment, the Panama Canal Authority told Reuters.

two-thirds of primary energy supply, making Panama vulnerable to global price volatility and rising costs for fuel imports. At the same time, the growing impact of climate change has led to droughts and disrupted the country's hydropower resources. To address these challenges, Panama's National Energy Plan 2015-2050 has started moving the

The National Energy Secretariat of Panama has launched an energy auction aimed at contracting power for the 2025-30 period. The Panamanian authorities will hold the procurement exercise before Dec. 10, allowing power producers to compete in two categories: contracting power and providing capacity, with contracts lasting up to 60 months.
