

Can solar panels reduce wave height in the Indian Ocean?

With academic and commercial partners in Indonesia, they hope to have a demonstration system in the Indian Ocean in 12 months time. Called Solar2Wave, it will have a floating breakwater upstream of the solar panels which, Mr Huang says, has the effect of reducing wave height by about 90%.

Can a solar plant be used in the Indian Ocean?

Mr Huang's team at Cranfield University is working on an alternative offshore solar plant, which he says will be robust and cheap. With academic and commercial partners in Indonesia, they hope to have a demonstration system in the Indian Ocean in 12 months time.

Can solar panels be installed on the ocean surface?

So scientists and engineers are working on ways to install solar panels on the ocean surface, providing power to those living onshore nearby. "Floating solar is very convenient because it can just be put on top of the water, and if you need more electricity you can put on more solar panels," says Mr Huang.

Can solar power help people living on remote islands?

"Those people who don't have electricity are living on remote islands, so in this situation it's hard to connect a cable to them and it's hard to install other expensive solutions such as wind turbines," says Luofeng Huang, a lecturer in mechanical engineering at Cranfield University. Solar power is one option to provide those islands with energy.

Could floating solar photovoltaic panels supply all the electricity needs?

Floating solar photovoltaic panels could supply all the electricity needs of some countries, new research from Bangor and Lancaster Universities and the UK Centre for Ecology & Hydrology has shown. Floating solar photovoltaic panels could supply all the electricity needs of some countries, new research has shown.
