The project will bring electricity to rural households; expand renewable energy generation; support the modernization of the country's electricity ...

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

This document sets out the national policy and strategies for the energy sector that are aligned to the legislative reforms in tandem with Papua New Guinea's Vision 2050. To transform Papua New Guinea into a globally competitive, newly industrialized, with middle income status and a prosperous country, it needs low cost energy.
