Is TotalEnergies planning a large-scale LNG project in Papua New Guinea?

TotalEnergies, alongside ExxonMobil (37.04% interest), Santos (22.83%), and JX Nippon (2.58%), is planning a large-scale liquefied natural gas (LNG) project in Papua New Guinea (Papua LNG).

Will Papua LNG make money?

Papua LNG is only the second large-scale natural gas project in the country and, if completed, would rival Indonesia's gas exports. However, by the time the project is expected to come online, experts are projecting a glut in gas prices due to flooded markets. In essence, there is little revenue certainty for the project.

Does Papua New Guinea have oil & gas extraction projects?

According to Global Energy Monitor's Global Oil and Gas Extraction Tracker (March 2024 release), Papua New Guinea has five discovered oil and gas extraction projects: the Pasca Oil and Gas Field, the Stanley Oil and Gas Field, the Kutubu Oil Project, the P'nyang Gas Field, and the Elk-Antelope Gas Field.

How much wind power does Papua New Guinea have?

Wind Power Density of Papua New Guinea at 100 meters, as published by the Global Wind Atlas. According to the International Finance Corporation's Powering the Pacific report, PNG has vast untapped renewable energy potential. Estimates are as follows: Hydropower: Gross potential of 20,000 MW, with a technically feasible potential of 14,000 MW.

What is Papua LNG?

Papua LNG will consist of nine production wells, a gas processing plant, a 320-km pipeline, and liquefaction units that process the gas into liquid for transport. Total capacity is estimated to be 5.6 million tonnes per annum (Mtpa). The project will connect to ExxonMobil's existing PNG LNG plant in near Port Moresby.

Does Papua New Guinea need electricity?

The Government of Papua New Guinea also aims to increase electricity access to 70% of the population by 2030, a goal which will require connections of 100,000 households per year.

Wolong Battery Energy Storage Solution (BESS), has been enjoying tremendous growth in the market share. With our brand new, purposed built factory with size of 130,000sqm located in Shaoxing City, we are capable of annual output of 10GWh with inhouse production lines cover Cell/Pack Production, PCS, PCB Board, Transformer and also Integration with full assembly.

Wolong energy storage transformer adopts a three-phase dry-type transformer with double winding to provide low loss, non-excitation voltage regulation and epoxy resin cast maintenance-free power transformer. It is tailor-made for energy storage step up cabin integrated machine, conforms to the standard cabinet size of
