Experience increased safety brought by LiFePO4 battery and BMS (Battery Management System). Compared to traditional Lithium-ion cells, the LiFePO4 battery EB3A adopts possesses a natural advantage due to its remarkable ...

What you need, is an inverter-charger/battery install and a transfer switch. When grid power on, the inverter-charger charges your battery bank. When the power goes down, you flip the transfer switch, and plug in the output of the inverter to the transfer switch generator plug in.

Generators vary in cost based on numerous factors, including fuel type, manufacturer, AC output and storage capacity, and performance. Diesel and other fossil fuel generators emit deadly carbon monoxide and must never be operated indoors. Solar generators and portable power stations provide quiet backup electricity that's 100% safe for indoor ...
