

How DES is transforming the power sector in the Philippines?

The advent of DES applications in the Philippines is progressively transforming the landscape of the power sector and its associated challenges. Today, DES begins to become part of the country's power system primarily for services such as emergency power, uninterruptible supply, or ancillary service.

Where is the power plant located in the Philippines?

The coal-fired Quezon Power Plant in Barangay Cagsiay I in Mauban, Quezon. The electricity sector in the Philippines provides electricity through power generation, transmission, and distribution to many parts of the country. The Philippines is divided into three electrical grids, one each for Luzon, the Visayas and Mindanao.

Is the Philippine energy sector open for business?

The Philippine energy sector is open for business. In fact, there is a huge potential for investment opportunities for both on-grid and off-grid infrastructure in the areas of power generation, transmission, and distribution.

Is distributed energy system a viable option in the Philippines?

These are just some challenges that have prompted the Philippines to start exploring distributed energy system (DES) as a viable option to satisfy immediate electricity demands.

How is power transmission regulated in the Philippines?

Power transmission in the Philippines is a common carrier business (i.e. regulated by the government, serves its franchise area without discrimination, responsible for any losses incurred during delivery). It is regulated by the ERC who has rate-making powers and the final say in the valuation of transmission assets.

What is the framework of electrification in the Philippines?

The framework of Philippine electrification is fundamentally shaped by the Electric Power Industry Reform Act of 2001 (EPIRA), which covers rules governing power generation, transmission, distribution, supply and competition. The passage of EPIRA was a pivotal moment in the policy direction of the Philippines on electrification.
