

What is solar photovoltaic bracket?

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel and stainless steel. The related products of the solar support system are made of carbon steel and stainless steel.

What types of solar photovoltaic brackets are used in China?

At present, the solar photovoltaic brackets commonly used in China are divided into three types: concrete brackets, steel brackets and aluminum alloy brackets. Concrete supports are mainly used in large-scale photovoltaic power stations. Because of their self-weight, they can only be placed in the field and in areas with good foundations.

What is an example of an assembled steel bracket?

The following is an example of an assembled steel bracket. First, high-quality section steel usually has a high-level galvanizing process. According to the requirements of national standards, the average thickness of the galvanized layer should be greater than 50mm, and the minimum thickness should be greater than 45mm.

What makes a good bracket system?

(6) The cost should be reasonable. A high-quality bracket system must use computer simulation software for extreme weather conditions to verify its design, and conduct strict mechanical performance tests, such as tensile strength and yield strength, to ensure the durability of the product.

What are the technical difficulties in assembling section steel brackets?

In short, there are many technical difficulties in the production process of the assembled section steel bracket, which requires metallurgical engineering and technical personnel to overcome technical barriers and further reduce its use cost.

Material Selection and Exquisite Craftsmanship - The PV brackets from CHIKO are made of rigorously selected materials, such as corrosion-resistant aluminum alloy, high-strength carbon ...

Usually fixed by the fixture connection. Compared with the traditional roof bracket, color steel tile roof photovoltaic bracket is good looking: metal tile roof photovoltaic ...

The materials of solar brackets mainly include aluminum alloy (Al6005-T5 surface anodized), stainless steel (304), galvanized steel (Q235 hot-dip galvanized) and so on. ... It is widely used ...

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum ...

Its main business includes various photovoltaic fixed ground mounting structure, aluminum mounting structure, tracking system, carport, BIPV structure, flexible mounting bracket and ...

CHIKO's photovoltaic bracket has the following characteristics: ??????????????: Strength and stability: Our bracket is made of high-quality aluminum alloy material, which ...

2? The application of CHIKO Solar Energy in the field of photovoltaic brackets. CHIKO Solar is a world leading manufacturer of solar brackets, headquartered in Shanghai and established in ...
