How to replace a fuse inside a PV DC combiner box?

If you have to replace a fuse inside a PV DC COMBINER BOX, use the same type of fuses delivered with the original combiner box. Pay special attention to the voltage and current rate as well as the size and material. The fuse holder terminals allow to connect the string ca-bles safely. Clamping range, min. / max.

How do you disconnect a PV combiner box?

Ensure the circuit breaker is in the "OFF" or "TRIP" position (or the load isolation switch is in the "OFF" position) to disconnect the combiner box from the PV DC output side. All fuse holders inside the combiner box should be open (or remove the fuse core using specialized pliers) to disconnect the DC combiner box from the PV string input side.

What happens if a combiner box fuses?

Since the components have been combined, the short-circuit current is significant, potentially causing fuses under the same inverter to blow and, in severe cases, destroy multiple combiner boxes in the same string. DC Cable Ground Insulation Failure:

Does the PV combiner box have a DC disconnection switch?

The PV DC COMBINER BOX has a DC disconnection switch by default. The DC voltage of the switch depends on the voltage of the PV string. The switch disconnecting and breaking capacity (according to the IEC 60947-3) has been selected to assure that it can switch the circuit at full load at the maximum operating temperature.

Does a PV DC combiner box lose torque?

The PV DC COMBINER BOX has a mark on all screws and nuts to indicate the torque position. If the mark is unchanged since the previous inspection, there is no loss of torque. Regard the tightening torques in the specific documentation inside each PV DC COMBINER BOX. Check if any of the marks on screws and nuts have been changed.

Is the PV DC combiner box CE-compliant?

Carry out earthing and measures against short-circuiting The PV DC COMBINER BOX is CE-compliant in accordance with Directive 2014/35/EU (Low Voltage Directive) and with Directive 2014/30/EU (EMC Directive). PV DC COMBINER BOX is a complete range of tailor-made Level 1 combiner boxes for utility-scale photovoltaic systems.
