

# Photovoltaic panel bracket falls off

How do solar PV roof fixing systems work?

Get more information about solar PV roof fixing systems at the Ecofirst website. Solar PV tracking systems move the PV panels to track the sun, and are claimed to produce up to 30 per cent more electricity than a static array. The downside is the additional cost.

What type of fixing system is used for solar PV panels?

The type of fixing system used will depend on whether the solar PV panels are going to be: ground mounted. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and clamps.

How do I know if my solar PV breaker is bad?

First check the solar pv breaker in your consumer unit. It should be in the on/up position. If it's in the off/down position (which can happen after a power cut) try to flick the switch back on. If it trips back to the off position, leave it off and call an engineer. Also check your inverter for any fault codes or error messages.

Can solar panels be installed on a flat roof?

Panels being fastened to rails on-roof. Panels, therefore, sit on top of the rails and are fixed down using clamps. On-roof solar is probably one of the cheapest forms of installing solar panels. It's also very flexible, giving plenty of layout options. Installing solar panels on flat roofs is fairly simple to do.

Can solar PV systems be installed on a pitched roof?

The guidelines also say that provision must be made for ventilation behind the solar PV modules to provide cooling. With the introduction of MCS012 in March 2012 we would now expect all MCS certified installers of solar PV systems to install solar PV systems on pitched roofs using only MCS012 certified roof fixings.

Do you need Scaffolding for solar panels?

Unless your building is single storey, you'll need to have scaffolding put up. The fixing system used to hold solar PV panels on your roof must be strong enough to support the weight of the panels in all weather conditions, including strong wind.
