

Photovoltaic panel crack repair

How to fix a broken solar panel?

The first step is to identify the broken solar panel. Once you have found the broken solar panel, you will need to remove it from the system. To do this, you will need to disconnect the power from the solar panel and then remove the screws that are holding it in place. Once the solar panel is removed, you can now proceed to the next step.

Can solar panels be repaired?

Solar panels are a great way to save money on your energy bill, but they can occasionally break down or stop working correctly. If you're having issues with your solar PV system, our accredited installers can carry out repairs to get it back up and running. What Solar Panel Repairs Can We Help With?

What causes a broken solar panel?

The most common cause of a broken solar panel is cracked glass. If the glass on your solar panel is cracked, you will need to replace it. You can purchase a replacement solar panel online or at a local hardware store. Once you have replaced the broken solar panel, you can now proceed to the next step.

How do I choose a solar panel repair company?

Ideally, you'll choose a solar panel repair company that can help to service and repair your solar panel system for many years to come. Help get that selection right first time by checking out online reviews from previous customers. For such an important investment in your home, this simple action will provide the reassurance you need.

What if a solar panel is damaged?

If a solar panel has been damaged and compromises the system's performance, it will need to be replaced with a new compatible panel. If you have a warranty on your solar system, check to see if the damage is covered before proceeding with repairs. In most cases, the damage will not be covered under warranty, but it is always best to check.
