What are the requirements for large PV power plants?

Large PV power plants (i.e.,greater than 20 MW at the utility interconnection) that provide power into the bulk power system must comply with standards related to reliability and adequacypromulgated by authorities such as NERC and the Federal Energy Regulatory Commission (FERC).

Why do PV modules need to be cleaned?

PV module efficiency: the lower the efficiency the more area (m2) of array needs to be cleaned for the same benefit. It is tempting to combine these parameters to calculate a cleaning interval that justifies the cleaning expense.
