

Photovoltaic panel installation price list table

How much does a solar panel installation cost?

The best way to evaluate the price of a solar panel installation is in dollars per watt (\$/W). Similar to comparing dollars per square foot when shopping for a home, \$/W helps standardize the cost of solar by showing the cost of solar on a per watt basis. Currently, the average price of a solar panel system installed in the U.S. is \$2.91/W.

What factors influence the average cost of solar panel installation?

The factors influencing the average cost of solar panel installation include hard and soft costs. Hard costs include the physical equipment like racking, panels, inverters and batteries. Soft costs include sales tax, installation labor, permitting, company overhead and marketing.

How do I get the best value on solar panels?

Here are some tips to get the best value on solar panels for your home. Get multiple quotes. Receive and compare several quotes for solar to compare the total cost, quality of products and warranty terms. If you find a company you like but their price is higher than another, ask if they will price match.

How much does a 5000 watt solar system cost?

A fully installed solar system typically costs \$3 to \$5 per watt before incentives like the 30% tax credit are applied. Using this measurement, 5,000 Watt solar system (5 kW) would have a gross cost between \$15,000 and \$25,000. The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range.

How much do Solar shingles cost?

These photovoltaic (PV) materials replace or overlay your current shingles, converting sunlight into electricity. Solar shingles are typically more expensive than standard panels, with costs ranging from \$15,000 to \$20,000 for an average installation, but they offer a more streamlined look and can increase the value of your home.

How much does a solar inverter cost?

Inverter replacement: If your solar system uses a string inverter, it may need to be replaced. String inverters generally last between 10 and 12 years, while solar panels last for 25 years or more. Getting a new string inverter could cost about \$1,500.

The below table shows the average solar panel cost by city & size of solar panels installed (DC). The prices in all the below tables include the up-front incentive available for small-scale systems through the Renewable ...
