How to install solar panels for warehouses?

There are several ways to install solar panels for warehouses and angle them in such a way as to achieve optimal energy generation. To summarise, the most suitable warehouses for solar PV technology are those with high energy consumption and large, unobstructed roof areas facing south.

Can solar PV be installed on warehouse roofs?

Installing solar PV on warehouse roofs means generating free electricity for the warehouse and adjacent buildings, such as offices. Warehouse and logistics firms can significantly reduce their energy bills with a solar PV system.

Which warehouses are suitable for solar PV technology?

To summarise, the most suitable warehouses for solar PV technology are those with high energy consumption and large, unobstructed roof areas facing south. However, each warehouse needs to be assessed individually to determine its suitability and to ensure maximum energy production and cost savings.

How efficient are solar panels for warehouses?

The efficiency of solar panels is always measured in percentages. If we say that the sun produces 100% energy, solar panels for warehouses are generally capable of converting between 15% to 22% into usable energy for your premises.

Should you rent out or install solar panels in a warehouse?

Consider renting out your roof space. If you have a warehouse with plenty of roof space but you don't want to install solar panels, you can consider renting it out and in turn pay a discounted rate for solar electricity. That way, you can get the cost-saving advantages of a solar energy system without outright buying and installing one.

Is solar PV a good option for warehousing & logistics?

As a large proportion of energy consumption is electric, solar PV is a great way to meet this demand. For warehousing and logistics premises, the main benefits of solar energy are: sustainability - meet green criteria and improve your public image. Depending on the hours you operate, it might be worth considering a time of use tariff.

As energy efficiency rises to the top of the agenda for warehouse and logistics firms, more and more are seeing the benefits of solar PV. Installing solar PV on warehouse roofs means ...
