Are wood pallets the best solution for your solar business?

Wood pallets are the standard when it comes to shipping and storing PV modules. But are they the best solution for your solar business? Installers, distributors, and solar module manufacturers are all considering what approach is best for their operations and their bottom line.

Can You ship solar modules on a wood pallet?

Traditional Solar Module Packaging: Cardboard on a Wood Pallet When it comes to shipping solar modules, wood pallets can threaten the integrity of your expensive cargo. Here are some common frustrations with wood pallets: Managing partial loads of solar modules is cumbersome, time consuming, and often result in unnecessary breakage.

Why should you choose pv pallet?

PV pallet helps solar companies reduce waste, streamline operations, and save money through reusable packaging and turnkey logistics solutions. Why choose PV pallet? We're focused on making life easier for everyone in the solar supply chain--from manufacturers and distributors to EPCs and solar installers.

What is the PV pallet Series X?

The PV pallet Series X allows for easier and safer deployment and decommissioning of solar microgrid systems. It also enables the acceptance and management of solar panel donations in a way that wasn't possible before. The fact that these units can be stacked two-high outside significantly increases storage capacity.

With these numbers, the true cost of wooden pallets for a 1 MW installation is \$119,500 (versus the \$8300 spent on the pallets). When considering all the costs associated with wood pallets, even "free" pallets ...
