

# Photovoltaic panel workers delay wages

How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$48,800 in May 2023. Employment of solar photovoltaic installers is projected to grow 48 percent from 2023 to 2033, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

Does BLS have wage data for the solar power industry?

BLS does not currently have wage data specific to the solar power industry. However, BLS does have wage data for the Semiconductor and Other Electronic Component Manufacturing industry group, which includes production of solar panels. The following table shows BLS data for selected occupations in this industry group for May 2010.

What does a solar photovoltaic installer do?

Solar photovoltaic installers are key to the process of solar panel installation and maintenance. They use specialized skills to install residential and commercial solar projects. They are responsible for safely attaching the panels to the roofs of houses or other buildings and ensuring that the systems work.

Do solar installers need a wage & apprenticeship?

For solar installers working on government projects, prevailing wage and apprenticeship requirements are not new. In the wind energy sector, where larger and more established companies dominate, there has not been widespread panic about these regulations.

Do plumbers & electricians work on solar installation projects?

Plumbers and electricians working on solar installation projects must also have specialized training on the systems that they will be installing, or they must work under the supervision of a qualified solar photovoltaic installer.

What skills does a solar photovoltaic installer need?

Solar photovoltaic installers must be able to work with power tools and hand tools at great heights, and possess in-depth knowledge of electrical wiring as well as basic math skills. When necessary, installers must be problem solvers, able to repair damaged systems or replace malfunctioning components.

The median annual wage for solar photovoltaic installers was \$48,800 in May 2023. The median wage is the wage at which half the workers in an occupation earned more than that amount and half earned less. The lowest ...

Delays and Communication One of the most common challenges in obtaining PTO is delays, often due to bureaucratic processes or communication issues between the solar installer, the ...
