Which solar panels match red-tiled roofs?

Austrian solar manufacturer Sonnenkraft has debuted its new "Terracotta" solar panel that matches red-tiled roofs and is historic-building compliant.

What are tile-colored solar panels?

Tile-colored solar panels are exactly the same as regular solar panels,with the only difference being that the color is tile-colored instead of blue or black. Colored solar panels are useful for both isolated solar installations and self-consumption solar installations.

Are coloured solar panels popular in the UK?

This means browns,reds and greys are a popular choice although more vibrant colours like pink and green also exist in the market. Whilst coloured solar panels are not widely encountered in the UK yet,they have taken off in America and parts of Europe where coloured roof tiles are more commonly seen. Do coloured solar panels cost more?

Are coloured solar panels better than standard solar panels?

But regardless of the colour of your solar panels,the difference in efficiency between standard panels and coloured panels is not overly large. According to YouGen,coloured solar panels will generally only produce 20-40W less energy than a black or blue panel - dropping from 265W for a standard panel to 230W-245W for a coloured version.
