

Photovoltaic power panel scam exposure case

Are solar panels a scam?

That is, of course, also a scam. To protect yourself from clean energy scams: Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more.

Are rooftop solar panels a scam?

While rooftop solar panels are becoming increasingly ubiquitous in homes throughout the United States, the industry also has a more sinister side: a seemingly widespread problem of fraudulent business practices that has cast a shadow over many solar panel companies.

Is solar panel fraud a global issue?

And while the aforementioned data focuses on the United States, solar panel fraud is a global issue. It is especially prevalent in Canada, where in the city of Calgary alone, the amount of applications for rooftop solar panels "has increased by nearly 600% since 2020," said the CBC.

Why are prosecutors investigating rooftop solar?

Across the country, prosecutors are investigating high-pressure sales tactics and misleading financing arrangements. Some customers say they were victims of fraud and forgery. This threatens rooftop solar's impressive momentum. Now, some solar companies are working to repair the industry's reputation.

Can bad actors wiggle their way into home solar panel installation?

Since home solar panel installation is still a relatively young business, there's ample room for bad actors to wiggle their way in to make a go at your wallet.

Are solar leases and PPAs a good choice?

Solar leases and PPAs are a good choice for some people, but you have to be very careful when vetting a company that offers these methods of third-party ownership. The contracts often last for 20 years or more, and some companies include "escalator clauses" that increase the payments by a small percentage each year.

Solar cells (SCs) are the most ubiquitous and reliable energy generation systems for aerospace applications. Nowadays, III-V multijunction solar cells (MJSCs) represent the standard ...
