How much do flat roof solar panels cost?

Flat roof solar panels can cost between £2,800 - £12,100 for the average 2 to 3 bedroom house. Flat roof solar panels cost less in terms of labour costs since installation is easier (however this depends on your roof). One downside of putting solar panels on a flat roof is that they take up more space per kW.

How much does a solar panel installation cost in the UK?

Also, don't forget about the tax-free Feed-In Tariff payments from the government. The average residential solar panel installation consists of either 12 or 16 solar panels. The average cost of a solar panel installation in the UK is between £5,000 and £8,000.

How much do solar panels cost?

But the average solar panel system of 3.5kWp will cost around £7,000 to install, according to estimates from the Energy Saving Trust. The exact cost will vary, depending on the size of your home and how much electricity you want to produce. See how much you can expect to pay. Find out: are solar panels worth it?

Are flat roof solar panels a viable option?

In reality, flat roofs are just as viable and can bring many unique advantages, being easier to maintain and offering a simpler installation process. Let's discuss the costs, benefits, and drawbacks of flat roof mounted solar panels.

Can you put solar panels on a flat roof?

One downside of putting solar panels on a flat roof is that they take up more space per kW. When considering what type of roof is ideal for solar panels, many often consider pitched roofs as the only option. Homeowners also often ask "Can you have solar panels on a flat roof?".

Will my feed-in tariff decrease if I install solar panels on my roof?

Well, don't worry. Once you have your solar panels installed on your roof the government will continue to pay you the current rate that it's worth for the next 20 years. That means that your Feed-In Tariff payments will not decline at all over the next 20 years. Roof Solar Panel Installation Costs
