How can we protect the Pitcairn Islands?

The waters around the Pitcairn Islands are a Marine Protected Area and support a wealth of marine wildlife. To protect this pristine marine environment, we need to take steps to prevent the introduction of invasive non-native species (INNS). INNS are species that are introduced to an area outside of their natural range.

Are the Pitcairn Islands a marine reserve?

The Pitcairn Islands are some of the most remote on Earth. The surrounding waters contain intact deep-sea ecosystems, and their coral reefs harbor abundant sharks and large fishes. In March 2015 the U.K. government established the area as a no-take marine reserve--the largest single reserve in the world.

What is the Pitcairn Islands Marine Protected Area (MPA)?

The legislation is significantly shaped by the Pitcairn Island Council. The Pitcairn Islands Marine Protected Area (MPA) wins the Platinum-level Blue Park Award for exceptional marine wildlife conservation. This recognition is a testament to Pitcairn's commitment to preserving its unique and diverse ocean ecosystem.

How many people live in the Pitcairn Islands?

Pitcairn is the only inhabited island, with around 50 permanent residents. The Pitcairn Islands are also home to one of the largest marine protected areas in the world, where hidden under its clear waters, coral reefs are abundant.

How are marine inns introduced to the Pitcairn Islands?

Marine INNS may be introduced into new areas by various means. This includes in ships' ballast water or by attaching to hulls and other submerged parts of boats or equipment. Before travelling to the Pitcairn Islands, please read our marine biosecurity leaflet and comply with the guidance within it.

What is the Pitcairn Island MPA ordinance?

Drafting of the Pitcairn Island MPA Ordinance. The legislation is significantly shaped by the Pitcairn Island Council. The Pitcairn Islands Marine Protected Area (MPA) wins the Platinum-level Blue Park Award for exceptional marine wildlife conservation.

A large part of Pitcairn Island's early history will forever remain a mystery. The full history of both the earlier Polynesian community and of the Bounty settlers will never be completely known. [See "Pre-Mutineer History"] Differing theories and contradicting stories concerning the events that took place after the mutineers arrived at Pitcairn, have been told.

Het eiland werd in 1767 ontdekt en genoemd naar de toen vijftienjarige matroos die het ontdekte, Robert Pitcairn. Het eiland was toen onbewoond, maar er waren sporen van eerdere bewoning. In 1790 zochten negen muiters van de HMAV Bounty, samen met twaalf Tahitiaanse vrouwen en zes Tahitiaanse mannen en een

baby, hun toevlucht tot het eiland. Zie Muiterij op de Bounty.
