

As the global shift towards decarbonization accelerates, the need for long-duration energy storage solutions is growing. MES technologies, such as liquid air energy storage (LAES), gravity-based energy storage (GES), and geomechanical pumped storage are leading this energy revolution, offering innovative solutions to meet the increasing demands ...

Energy Saving. Energy consumption in commercial buildings is a significant concern for businesses today. Lighting and HVAC devices alone account for 70% of a building's electricity usage, but inefficient building management systems ...

Following an EU commissioned study in 2017, the EU agreed to fund a Renewable Energy project for Pitcairn to replace fossil fuel with Solar Power under the EDF 11 Regional Envelope and we have been working with ...

Island Power produces green hydrogen from clean energy and water. We work with solutions for either injection in the natural gas pipelines, or as green ammonia, for usage in agriculture and chemical areas.

Porkeri wind farm was inaugurated at the beginning of this year, hosting seven turbines with a capacity of 6.3MW. Image: SEV. Hitachi Energy has been selected to supply a large-scale battery energy storage system (BESS) for a wind farm in the Faroe Islands, as the remote archipelago targets a goal of 100% renewable energy.

The storage deployment is part of the first stage of a €10.8 million (US\$14.21 million) project to demonstrate how solar, energy storage and other smart energy resources can transform the energy system of an island grid.

SunGrid deploying commercial energy storage systems using Powin Energy's battery storage racks at a site earlier this year. Image: SunGrid Reducing peak demand for commercial and industrial (C& I) electric utility customers in Ontario remains a big opportunity for using battery energy storage to reduce costs and decarbonise, three partner ...

Milan, 20 April 2022 - Nidec ASI, part of the Energy & Infrastructure Division of the Nidec Group, a group committed to relaunching the economy with an eye to greater sustainability, continues to grow in Europe, this time providing Battery Energy Storage System (BESS) solutions for a major project in Northern Ireland, UK.

As the global energy demand grows and the push for renewable sources intensifies, energy storage systems (ESS) have become crucial in balancing supply and demand, enhancing energy security, and increasing the ...

A similar industrial, heavy vehicle and power solutions firm, Volvo, took part in the same fundraiser and this year has also seen it expand into the ESS market. Caterpillar's new suite of products includes Cat power grid ...

JinkoSolar has introduced its new generation SunTera liquid cooled utility-scale energy storage system at the 2023 edition of China's Energy Storage International Conference and Expo in Beijing. The SunTera system is a powerful solution for applications including peak-shaving, microgrid and demand management, and aims to overcome the ...

Much of the company's other activities have been focused on battery storage solutions for the commercial and industrial (C& I) market segment, with Honeywell launching its newest BESS product, Honeywell Ionic, integrated with the company's own energy management system (EMS), Experion Energy Control System, for mid to large C& I applications ...

Tesvolt's new product, the TS-1 HV 80, comes with integrated energy management system (EMS) and inverter technology. It is designed to offer commercial and industrial (C& I) entities peak shaving functions that lower their energy costs by reducing their draw of electricity from the grid at peak times, but also offers onsite backup power and ensures ...

With over 100+ projects in its construction and installation portfolio, B& W continues to find new ways to bring clean power production to our customers. Some of these projects are highlighted to show the breadth and width of our custom solutions. Since every project is custom, contact us to collaborate as together we achieve our net-zero ambition.

"Bulk" storage solicitations could signal boom in New York . The state also has in place a target of deploying 6GW of energy storage by the end of this decade with an interim 3GW target by 2025. While that is among the US' most ambitious policy targets, regular readers of Energy-Storage.news will be aware that progress to date has been slow.

As regular readers of Energy-Storage.news may know, Singapore already reached a 200MW energy storage deployment target two years ahead of time with the start of commercial operations at a large-scale battery energy storage system (BESS) at Jurong Island, which is home to much of the country's energy generation infrastructure.
