Discovery of Pitcairn Island . Captain Philip Carteret first spotted Pitcairn Island in 1767 but couldn't land due to rough seas. He miscalculated its location, marking it miles away from its true position. Years later, Captain Cook showed some interest, but it wasn't until the Bounty mutineers arrived in 1790 that the island gained attention.

The global biological value of the marine ecosystems of the Pitcairn Islands is outstanding, and deserves strict protection and recognition. A large no-take reserve, while allowing for traditional small-scale uses, conserves this unique environment, attracts scientific and conservation interest in studying and protecting the area, and also increases tourism to the islands, all of which ...
