

How much solar energy does Portugal produce?

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country generated more than 3.99 TWh of solar energy in just the first nine months, exceeding last year's total of 3.6 TWh.

How much energy does Portugal generate from renewables?

Portugal generated an 'historic' 95 per cent of its electricity from renewables in April, according to the network operator REN. Renewable energy generation averaged just below that for the first four months of the year, covering 91 per cent of the nation's power needs.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

What is Portugal's commitment to photovoltaic energy?

Portugal's commitment, as underscored by Decree-Law No. 162/2019, facilitates the adoption of PV technology, allowing residents and businesses alike to tap into the sun's inexhaustible energy. Why Photovoltaic Energy? This innovative approach to energy generation is about transforming how we consume energy.

What is Portugal's energy transformation?

Portugal's transformation is more than just about energy production; it's a narrative of resilience, innovation, and community spirit. As the country forges ahead, its commitment to renewable energy serves as a powerful reminder that a brighter, greener future is possible, and it begins with each of us.

How much energy does Portugal use in 2023?

In 2023, the country's primary energy consumption stood at 0.95 exajoules, with renewables accounting for over 35 percent of that amount. In the electricity sector, renewables hold a much larger share. Portugal's renewable power capacity has been growing steadily in the last years, surpassing 18 gigawatts in 2023.

Already this year, the program subsidies for solar panels do not go beyond 1,000 euros for applications from Lisbon or Porto, without energy storage systems. For the remaining regions, the support is increased by 10% ...

While Portugal's revised National Energy and Climate Plan (NECP) and Long-Term Strategy for Carbon

Neutrality (LTS) have raised targets for decentralised solar photovoltaic (PV) capacity, they remain below the country's solar potential.

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country ...

Renewable power sources supplied 61% of Portugal's electricity in 2023, up from 49% a year earlier, hitting a new record thanks to periods of heavy rains, strong winds and good doses of sunshine...

Renewable generation supplied 61% of the electricity consumption in Portugal in 2023, totalling 31.2 TWh, the highest-ever recorded value in the Portuguese national system. Wind power supplied 25% of the consumption in Portugal, hydropower contributed 23%, photovoltaics accounted for 7% and biomass for 6%.

Already this year, the program subsidies for solar panels do not go beyond 1,000 euros for applications from Lisbon or Porto, without energy storage systems. For the remaining regions, the support is increased by 10% and can grow up to 1,100 euros.

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcoutim. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the needs of 200,000 homes. It occupies an area of 320 hectares and will prevent the emission of 326,000 tons of carbon dioxide every year. [5]

Portugal is intensifying its commitment to renewable energy with the announcement of new incentives aimed at promoting solar panel installations and enhancing window efficiency in residential properties.

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country generated more than 3.99 TWh of solar energy in just the first nine months, exceeding last year's total of 3.6 TWh.
