Solar Energy Systems & Components Trading Includes selling solar panels and slabs energy systems (photovoltaic) installed on tops and facades of residential and commercial buildings, or on the ground to generate power for use in water heating and cooling and energy supply, it also includes the installation, repair and maintenance services for the same equipment.

Solar Simplified - Do you know, more than 70% of solar project's time and money is spent in making the solar components available to the site, in other words, it is the material management which drives the efficiency and cost of the solar projects.

The objective is to address this effectively to shorten the solar project turnaround time by 25-30% and with the overall cost reduction of 3-5%, especially for roof top - commercial and industrial installations.

S6-EH1P(3-6)K-L-PRO series energy storage inverter is designed for residential PV energy storage system, Support multiple parallel machines to form a single-phase or three-phase system with maximum power of 36kW. With UPS level switching time, 10s surge power overload and critical loads. Support 135A Charge and discharge capacity, provide higher energy ...
