

# Power safe opzs Mauritius

What is a powersafe OPzS battery?

PowerSafe OPzS batteries feature tubular plate technology that offers excellent cycling performance together with a proven long life under float voltage conditions. The pasted negative flat plate design provides the perfect balance for maximum performance across a wide capacity range.

What makes EnerSys powersafe OPzS a good battery?

Engineered with an optimized plate design, EnerSys PowerSafe OPzS batteries feature an increased capacity exceeding the DIN standard. Additionally, the die cast tubular plate design with low antimony offers excellent cycling capabilities and a proven long life under float conditions.

Are powersafe OPzS batteries ISO 9001 certified?

Batteries must be installed in accordance with IEC 62485-2 and national/local regulations. The management systems governing the manufacture of PowerSafe OPzS products are ISO 9001, ISO 14001 and ISO 45001 certified 2022 EnerSys. All rights reserved. Trademarks and logos are the property of EnerSys and its affiliates unless otherwise noted.

What is a powersafe OPzS cell used for?

The specification of the PowerSafe OPzS cells make it ideal for a wide range of applications such as telecommunications, power generation and distribution, railway, airport and seaport signalling, computing, emergency lighting, automation and measuring systems. Vent plugs - safety plugs equipped with flame arrestors.

PowerSafe OPzS 12OPZS1500 2V1500AH

Les batteries PowerSafe OPzS sont conçues avec la technologie de plaques positives tubulaires qui procure d'excellentes performances en cyclage ainsi qu'une longue durée de vie en floating. Les plaques planes empâtées négatives procurent l'équilibre parfait en matière de performances pour une grande plage de capacités.

Com um design de placa otimizado, as baterias PowerSafe OPzS têm uma capacidade que excede o padrão DIN reconhecido internacionalmente. Longa vida útil combinada com um desempenho praticamente livre de manutenção tornam a PowerSafe OPzS uma das baterias de

 performance de ses produits.

EnerSys PowerSafe 15 OPzS 1875 Summary: EnerSys PowerSafe 15 OPzS 1875 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

The robust design of PowerSafe OPzS batteries makes them a perfect fit for your application. They have a wide range of capacity; feature die cast tubular positive plates, special micro porous separator materials and can be ordered with special vent caps which do not have to be removed for topping electrolyte levels or specific gravity measurements.

Publication No: EN-OPzS-RS-002 - December 2007 The EnerSys ® range of Power Safe(TM) OPzS single cells has been designed for use in all standby power applications that demand the highest levels of reliability and security. PowerSafe OPzS cells benefit from an optimised plate design that results in
