

# Power system inc Tunisia

How much power does Tunisia produce?

Tunisia has a current power production capacity of 5,944 megawatts(MW) installed in 25 power plants, which produced 19,520 gigawatt hours in 2022. State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity.

How is power Tunisia funded?

The Power Tunisia Activity is funded through USAID and made possible by the generosity of the US government and the American People. The author's views expressed on this website do not necessarily reflect the views of the United States Agency for International Development or the United States Government

Does Tunisia have a power grid?

Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023. Moreover, in August 2023, Tunisia's sub-sea connection project with Italy, called ELMED, was approved for \$337 million funding from the European Commission.

Does Tunisia have solar power?

Tunisia has significant solar potential given the country's high irradiance, ranging from 1800 kWh/m<sup>2</sup> per year in the North to 2600 kWh/m<sup>2</sup> per year in the South. This equals approximately 1,980 sunshine hours per year.

How many kV power lines are there in Tunisia?

The project will consist of 660 km of 525-kV AC DC overhead lines in Tunisia, 661 km of 525-kV DC submarine cables, and 7 km of 525-kV DC and 400-kV underground cables, terminating at an existing high-voltage substation. Tunisia's power sector is well-developed, with 99.8% of its population having access to the national electric grid.

The Tunisian banking sector is composed of 30 banks, 12 of which are publicly traded on the Tunisian stock market. The largest banks are the state-owned Soci t  Tunisienne de Banque (STB), Banque National Agricole, and Banque de l'Habitat (BH), which collectively represent 40% of banking assets and 34% of banking sector deposits.
