What is a powersafe#174; SBS battery?

PowerSafe#174; SBS batteries have been developed to retain the long float life characteristics associated with Thin Plate Pure Lead (TPPL) Technology and has the added capability to deliver high performance in harsh applications where cyclic duty predominates.

Where are powersafe#174; batteries marketed?

PowerSafe#174; products are marketed under the SuperSafe#174; brand in the following specific countries - India, Indonesia, Malaysia, Singapore, Thailand, Australia and New Zealand. Featuring advanced Thin Plate Pure Lead (TPPL) technology, PowerSafe SBS batteries deliver long life, high energy density and superior shelf life for telecommunications.

What is the maximum operating temperature of a powersafe SBS battery?

The maximum operating temperature of the PowerSafe SBS J battery series can be extended to 80#176;C via an optional metal jacket. PowerSafe#174; SBS batteries are designed for use in cabinets or on stands, close to the point of use. A separate battery room is not required.

What is a powersafe HB30 battery?

PowerSafe#174; SBS batteries are designed for use in cabinets or on stands, close to the point of use. A separate battery room is not required. SBS HB30 battery is fitted with a 533mm/21 inch harness that terminates in a 2-pin polarised plug-in connector, which is compatible with embedded power SLC systems.

Does powersafe#174; SBS accept unlimited current during recharge?

Due to the very low internal resistance, PowerSafe#174; SBS monoblocs and cells will accept unlimited current during recharge but for cost and practical purposes in float applications where recharge time to repeat duty is not critical, the rectifier current can be limited to the load plus 0.1C 10 Amps.

What temperature should a powersafe SBS monobloc be operated at?

However, PowerSafe#174; SBS monoblocs and cells can be operated in the temperature range -40#176;C to +50#176;C. In order to maintain mechanical integrity of the plastic components, the battery temperature in operation should not exceed +50#176;C. Monoblocs and cells lose capacity when standing on open-circuit because of parasitic chemical reactions.

PowerSafe SBS batteries are also widely used in cable TV, emergency lighting, power generation and offshore

La gama de baterías de terminal frontal PowerSafe; SBS XL se ha diseñado específicamente para su uso en aplicaciones de flotación, a altas temperaturas y en una red estable. Su espectacular vida útil prevista de 10 años a 35 °C ofrece a los operadores la libertad de reducir tanto los costes de capital, al invertir en muchos de ...
