

# Price announcement for the winning bid of photovoltaic bracket

Where can I find information about the solar auctions?

Further information about the auctions is available on the Bundesnetzagentur's website at (in German). The statistics for the auctions are updated after each auction. The next auction for second-segment solar installations will close for bids on 1 February 2024.

What happened at the 2023 solar auction?

The Bundesnetzagentur has today published the results of the auction for solar installations mounted on buildings and noise barriers (second-segment solar installations), which closed for bids on 1 October 2023. "This auction round was nearly twice oversubscribed, and the strong competition has led to lower award prices.

How many homes will be powered by the 6th renewables auction?

Sixth renewables auction delivers record smashing 131 clean energy projects powering equivalent of 11 million homes. Millions of homes and businesses across Britain will be powered by a new supply of clean, cheap, homegrown energy as a record number of projects receive funding through the government's most successful renewables auction to date.

Are competitive auctions the new normal for renewables?

IEA. Licence: CC BY 4.0 Have the prices from competitive auctions become the "new normal" prices for renewables? Prices are nominal; higher values for onshore wind in 2017-18 result from the United Kingdom's contracts for difference (CfD) auction, and in 2021 are associated with a delayed project from the Jordanian auction held in 2014.

How much does solar PV cost?

By technology, 2,036 MW were awarded in solar photovoltaic (1,000 MW are part of the offer in which there was no technology restriction) and 998 MW in wind. As for the prices achieved, according to Government data, the weighted average price was 24.47 EUR/MWh for solar PV and 25.31 EUR/MWh for wind.

How many megawatts did a company bid for a wind project?

A total of 84 companies made bids, reaching 9,700 MW, which is three times the power offered. The megawatts allocated were distributed amongst 32 business groups. Capital Energy is won the most megawatts with a total of 620 MW of wind projects (20% of the total offer).
