

Price of solar panel in Georgia

How much do solar panels cost in Georgia?

As of October 2024, the average solar panel system costs \$2.63/W including installation in Georgia. For a 5 kW installation, this comes out to about \$13,173 before incentives, though prices range from \$11,197 to \$15,149. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in Georgia?

While a 5 kW system will only cost you \$13,173 in Georgia, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Georgia?

How much does solar panel installation cost in Atlanta?

For example, prices for solar panel installation in Atlanta start at around \$25,100, while prices in Helen start at \$28,520. The average cost of solar panel installation in Atlanta is \$37,250, with most people paying between \$25,100 and \$49,400. Compared to the average cost of solar panel installation, this is relatively expensive.

How much do solar panels cost?

The cost of solar panels in Georgia is currently lower than the average price of \$3.00 per watt across the United States for residential solar power systems. The size of a solar panel system affects the installation cost, with larger installations having a lower cost per watt due to 'bulk pricing'.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

And the average price tag for solar panels in Georgia? About \$3.74 per watt. So, if you're reaching for your calculator, let me save you the trouble: A 10-kW system will set you back approximately \$37,400. Here's the simple equation we used: ($\$3.74$ price per watt \times 10 kW system size) \times 1,000 = \$37,400.

Facts. You'd think Georgia would make it legal to put solar panels up without HOA's being able to block but nope... HOA's have so much power to deny homeowners the right to put up solar. If your HOA thinks the panels aren't in good taste or don't go with the flow of your neighborhood, best of luck to you.
