

Is Myanmar a good place to use solar energy?

Myanmar is blessed with abundant sunshine, making it a great place to harness solar energy. The country has taken steps to increase the use of renewable energy sources such as solar energy and is currently in the process of establishing a solar power station in the Rakhine State.

What is Myanmar's Solar power potential?

Myanmar's solar power potential is estimated to total around 35 gigawatts-peak(GWp). "So far,less than 1% has been installed so there is huge solar potential," they highlighted. Very good solar potential exists in the central lowlands of Myanmar,where demand is the highest,they added.

Will Myanmar adopt solar power systems in its buildings?

We expect that more commercial and industrial clients in Myanmar will adopt Solar Power systems in their buildings in the near future, and it is exciting to witness the country moving towards greener technology.

Is solar energy gaining traction in Myanmar?

Solar energy is just beginning to gain some traction in Myanmar, a country that has been gradually opening up its economy and society to the world since 2011.

Is Myanmar a good country for generating electricity?

Renewable energy, in the form of large-scale hydroelectric power, already accounts for around 60%, the single largest share, of Myanmar's electricity generation mix. The country also has an abundance of natural gas, an important export and the source of hard, foreign currency export revenues, as well as domestic power generation.

Felicity Solar leads in renewable energy with advanced solar panels, solar street lights, and car charger adapters. Our products, including durable solar cell batteries, are tailored for modern, green living.

Sun Power Company was established since 1998. Being an oldest solar company in Myanmar, Sun Power has been distributing solar panels since 18 years ago. By using solar energy in Myanmar, we firstly introduced residential LED lighting system in 2009 and commercial LED lighting system in 2011.

The 30-megawatt Thapyaywa Solar Power Plant project was implemented by Clean Power Energy (CPE) Co., Ltd under the Build Operate Own system. It's the second solar power project completed in Myanmar, generating more than 200,000 kilowatt-hours electricity per day and 70.599 million kilowatt-hours per year.

"Even though we aren't required to pay taxes, the inflation rate makes solar and related components more expensive," said the solar importer. "That is why most people cannot afford to instal solar power at home." This leaves most Myanmar people to endure sleepless nights in the heat and dark, particularly during the hot season.

Burma's (Myanmar's) electricity generation mainly depends on gas and hydropower, while renewable sources such as solar and wind contribute merely one percent to the overall output. However, residential solar systems have gained significant popularity and widespread adoption since the year 2022.
