

Prominent energy solutions Niger

Who is prominent energy?

Prominent Energy specializes in providing sustainable energy solutions for both residential and commercial clients. Our team of experts is committed to making the transition to solar energy as smooth and efficient as possible, while also ensuring the highest quality of workmanship. Lack of knowledge is costly!

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.

What is the energy potential of Niger?

Niger has significant energy potential, rich and varied, that is weakly exploited. It consists of biomass (firewood and agricultural residues, the main source used by households for cooking), uranium, mineral coal, oil, natural gas, hydroelectricity and solar energy.

Why is access to energy a problem in Niger?

Despite this rich potential, access to energy is still a challenge for the authorities. Final energy consumption in Niger is estimated at 0.15 toe per capita, one of the lowest in the world. The weakness of this value is mainly due to limited access of Niger's households to modern energy.

Why should you choose prominent solutions?

ProMinent solutions simplify everything: even complex power plant systems are optimally organised through a combination of our pumps and metering systems. We'll take care of things for you

How much energy does Niger use?

Final energy consumption in Niger is estimated at 0.15 toe per capita, one of the lowest in the world. The weakness of this value is mainly due to limited access of Niger's households to modern energy. Indeed, over 90% of Niger's households use wood as fuel for cooking. Access to modern cooking fuels and other modern energy is still very limited.

Oolu was one of the first firms to successfully scale PAYG solar technology in the West African market. The company has grown from start-up to market leader in Senegal, Mali, Burkina Faso and Niger with operations in Nigeria. In 2021, the company raised US \$8.5 M in series B funding led by RP Global, an Austrian-based energy investor.

Fluid metering technology is ProMinent's particular speciality and it is perfectly complemented by water treatment and water disinfection products. Hence the modular programme, which comprises individual products and system solutions, offers every customer a maximum of flexibility and economy at any time and
