

How much electricity does French Polynesia use?

Hydroelectricity accounts for 23% of the electricity mix in French Polynesia. It is the first renewable energy source in French Polynesia with an installed capacity of 49.3 MW. Solar water heaters produce hot water using solar energy. In 2019, the electricity consumption saved is approximately 22 GWh, i.e. 3% of electricity consumption.

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

Is biomass a source of electricity in French Polynesia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What is PEC in French Polynesia?

In French Polynesia, mainly crude oil and its derivatives, hydraulic power and solar radiation PEC is expressed in tonnes of oil equivalent (toe), unit that allows the different energies to be compared in relation to their intrinsic characteristics. litres of hydrocarbons were imported in 2019 in French Polynesia. is the dependency rate.

AFD and the Polynesian authorities have jointly defined a support program to assist French Polynesia with its energy transition. By 2030, the renewable energy penetration rate in power generation will reach about 75%.

Discover data on Energy Production and Consumption in French Polynesia. Explore expert forecasts and historical data on economic indicators across 195+ countries. ... View French Polynesia's French Polynesia PF: Renewable Energy Consumption: % of Total Final Energy Consumption from 1990 to 2015 in the chart: max 1y 5y 10y. Apply max 1y 5y 10y ...

French Polynesia: Energy# Electricity - production: 800 million kWh (2014 est.) Electricity - consumption: 700 million kWh (2014 est.) Electricity - exports: 0 kWh (2013 est.) Electricity - imports: 0 kWh (2013 est.) Electricity - installed generating capacity: 200,000 kW (2014 est.)

More about energy in French Polynesia. Energy consumption per capita; Total emissions: 929,000 metric tonnes of CO2 (2022 est.) From petroleum and other liquids: 929,000 metric tonnes of CO2 (2022 est.) Electricity; Installed generating ...
