What is the Department of energy's role in Puerto Rico's energy recovery?

The U.S. Department of Energy's (DOE) role in Puerto Rico's energy recovery is to: Leverage its network of National Laboratories to supply advanced planning and modeling capabilities to stakeholders in Puerto Rico. Serve as a trusted unbiased convener and coordinator among relevant federal and local decision makers.

Does Puerto Rico have a solar program?

To further assist Puerto Rico's energy resilience and clean energy goals, DOE today announced that on February 22, 2024, residents can apply for DOE's Programa Acceso Solar (Solar Access Program) -- a program designed to connect up to 30,000 low-income households with residential rooftop solar and battery storage systems with zero upfront costs.

What is the Puerto Rico energy Resilience Fund?

This program is a consumer-facing application phase of the first round of funding from the Puerto Rico Energy Resilience Fund, a \$1 billion DOE program focused on improving the resilience of Puerto Rico's electric grid with an emphasis on the region's most vulnerable and disadvantaged households and communities.

Will Puerto Rico have a power energy system?

Studies of this scope are broadly needed throughout the world, as Puerto Rico is just one of many territories planning its power energy system for the long run. These future systems will have entirely new physics and operations; their complexity and integration will be unlike anything we have today.

Will Puerto Rico's solar power system rebirth?

The degree of distributed solar and storage expected in Puerto Rico is an amount that has not been attempted elsewhere. The journey of Puerto Rico's power system from widespread wreckage to renewable and resilient rebirth could be an enduring example for others to follow.

Will Puerto Rico meet its energy needs by 2050?

In 2019, the Puerto Rico legislature passed the Puerto Rico Energy Public Policy Act (Act 17), setting a goal for the commonwealth to meet 100% of its electricity needs with renewable energy by 2050, with interim targets of 40% by 2025, 60% by 2040, the phaseout of coal-fired generation by 2028, and a 30% improvement in energy efficiency by 2040.

Establecidos en el 2007, Puerto Rico Energy Solutions es una empresa netamente puertorriqueña; a dedicada a las soluciones de energía solar. Cuenta con un equipo de trabajo de calidad que incluye; ingenieros, energy managers, técnicos certificados, y una mano de obra especializada para realizar trabajos de la más alta calidad.
