

Puerto Rico solar cube 1500

What is a solar E Power Cube 1500?

You've come to the right place! The Solar e Power Cube 1500, an original Wagan Tech design, is THE ONLY all-in-one true Solar Generator in the market. What sets the "Cube" (as we affectionately call it) apart from the other devices in the market? First and foremost, it is completely self-contained and mobile.

How do I charge my solar E Power Cube 1500?

There are 4 main ways that the Solar e Power Cube 1500 and 1500 PLUS models can be charged: Solar, AC, DC, and Wind. There are two ways that the Solar Cube can be charged using Solar panels, both ways must have the Master Power Switch turned to the "ON" position. The first way is to open the on-board solar panels.

What is a solar E Power Cube plus solar generator?

The Solar e Power Cube PLUS Solar Generator features a 1500 watt power inverter, two 115V AC outlets, two 12V accessory outlets for powering DC appliances, two USB power ports (2.1A & 1.0A), and a digital LED voltmeter display for checking battery status.

How many solar panels can a cube take?

Solar Panels: Connected through the ports on the front panel of either cube via "Banana Plugs", additional solar panels can be added to further reduce recharge times. The Standard Cube can accept up to 150W of panels, this includes the onboard 80W array.

What is a cube solar generator?

First and foremost, it is completely self-contained and mobile. No other device in the market is a true all-in-one mobile Solar Generator. Portability, compatibility, and expandable, it's everything you need right now and into the future. The Cube comes in two models; the standard Cube (#2546) and The Cube PLUS (#2547) model.

Can a solar E Power Cube be charged?

In the "ON" position, the Cube is able to be charged and will supply power to the front control panel. When the Switch is in the "OFF" position, the Cube cannot be charged nor will it supply any power to the front control panel. There are 4 main ways that the Solar e Power Cube 1500 and 1500 PLUS models can be charged: Solar, AC, DC, and Wind.
