

Pure rental photovoltaic panels

What is the difference between a solar lease and a PPA?

These two financing options are very similar. The critical difference is that with a solar lease, you'll have a fixed monthly payment, whereas with a solar PPA, you'll purchase the power generated by your system at a fixed price per kilowatt-hour (kWh). What does that mean for you?

Is SunPower a good solar installer?

SunPower earns its position as the top national installer on our list for a handful of reasons: It installs the most efficient solar technology on the residential market, offers the most expansive service area and backs its installations with a warranty well above the industry standard.

Should you install solar panels on your property before signing a lease?

Leasing companies want to maximize their profit, so there's a chance you could wind up with more panels than you want and that they could be installed in highly visible places--such as facing the street--without any regard to appearance. To avoid that, check the final system design and placement before signing the lease.

Do solar leases include price escalators?

Solar leases will include price escalators to reflect the increase in electricity prices. However, there is no way to truly know how much the price of electricity will increase until it happens. Most solar leases will include an escalator between 1% and 5% per year.

Solar panel installations of this size can cost between \$25,960 to \$36,960 before applying the federal solar tax credit. The following factors will affect your solar panel's price tag: Location: Some locations have better tax ...
