Tokyo, Japan - December 2, 2021. Yokogawa Electric Corporation (TOKYO: 6841) announces it has acquired all of the outstanding shares of PXiSE Energy Solutions LLC., a San Diego-based developer of software that enables utilities and other grid operators to deliver reliable and stable power by managing renewables and distributed energy resources (DERs) in real time.

In a previous study, Raytheon found that short duration Li-ion energy storage can be used in Department of Defense (DOD) microgrid installations to improve reliability and significantly reduce costs compared to all-diesel microgrids.. The project profiled in this case study builds on the previous one and demonstrates that a PXiSE Microgrid Controller, when coupled with a ...

PXiSE (pronounced "pice"), a member of the Yokogawa Group, develops next-generation grid control technology that empowers utilities, developers, and asset owners to manage their energy resources and energy delivery more reliably and efficiently with renewable power plant controls, distributed energy resource management systems, and microgrids.
