

# Qi Solar Photovoltaic Panel Installer

How do you install a solar system?

Once the solar panels are installed, the system needs to be activated. This involves interconnecting the solar panels, installing the inverter, and commissioning the system. During this step, installers should note that as long as the solar panels are receiving sunlight, they have an open circuit voltage.

Should you choose a solar photovoltaic system?

Solar photovoltaic (PV) systems have become an increasingly popular choice for those looking to reduce their carbon footprint and save money on energy bills. Before choosing a new system, homeowners should know how a roof can impact options, the best ways to connect the panels, and more.

How do I choose a solar installer?

Credibility and Expertise- Seek out installers who have experience installing solar equipment and are knowledgeable about all aspects of the process. A good rule of thumb is to work with installers who have at least three years of experience. Ask them how long they've been in business and how many solar energy systems they've installed.

Should you install solar panels on a tracking system?

But, the benefit of installing them is that solar panels mounted on a tracking system will produce more electricity than if they were stationary. Your solar panel setup will also have an inverter (or multiple) connected through wiring to the panels.

Which solar inverter is best?

Depending on how your solar array is set up, one inverter solution may be more suitable than the other. String inverters are the most cost-competitive option, but power optimizers and microinverters are better for more complicated installations, such as those with panels facing multiple directions or panels that experience marginal shading.

What questions should you ask a solar installer?

A good rule of thumb is to work with installers who have at least three years of experience. Ask them how long they've been in business and how many solar energy systems they've installed. In fact, ask a lot of questions, including: What modules do they use and why?
