What is the APsystems QS1 microinverter?

The APsystems QS1, an innovative four-module, single-phase microinverter for residential applications, is now shipping. A bold step forward in microinverter technology, the QS1 offers 300% faster installation time, while offering the highest peak output power and up to 3X faster data transmission speed than PLC.

What is a QS1 microinverter?

Our new QS1 is a single-phase, four-panel MLPE grid-tied microinverter with intelligent network capabilities, independent MPPT per channel and panel-by-panel monitoring visibility. The QS1 is a true utility interactive microinverter. The QS1 incorporates a Reactive Power Control (RPC) with adjustability up to 0.7 leading and 0.7 lagging.

What is the APsystems QS1 microinverter?

APsystems breaks new ground once again with the QS1, a cutting edge microinverter design accommodating up to 4 high-capacity PV modules up to 365W+ with independent MPPT. A single-phase, smart grid-compliant microinverter, the

What is APsystems QS1 solar mlpe?

With millions of units sold producing more than 4TWh of clean, renewable energy, APsystems continues to be a leader in the ever-growing solar MLPE segment. The QS1 is a four-module, high-power microinverter for residential applications.

What is a QS1 power control?

The QS1 incorporates a Reactive Power Control (RPC) with adjustability up to 0.7 leading and 0.7 lagging. The QS1 has a continuous output of 1,200W with an industry-leading MPPT efficiency of 99.5%. The QS1 is an industry-first product which will further reduce labor costs of installation with its four-for-one design.

What is the difference between PLC & QS1?

A new design for APsystems, the QS1 offers 75% faster installation time, while offering the highest peak output power and up to 3X faster data transmission speed than PLC. A wider MPPT voltage range will result in a greater energy harvest for homeowners.

3. APsystems Microinverter QS1 Introduction The APsystems QS1 Microinverter connects to single phase grid and can also be configured for 3-phase grid, and operates with most 60 and 72 cell PV modules. Contact APsystems Customer Support for checking compatibility. For more information, please see the Technical Data page (p.18) of this manual.
