Is Hong Kong a good place to invest in wind energy?

Originally put up as a renewable energy demonstration project, the Lamma wind turbine evidences the plausibility of wind energy as a key contributor to the city's energy mix. Offshore wind energy, which can be built in Hong Kong's waters, offers the most significant energy transition technological option for the city.

How can Hong Kong reduce energy consumption?

One way to generate those would be through the introduction of an opt-out system (also known as green default) for all businesses, homeowners and tenants in Hong Kong to offset their own electricity consumption through the purchase of renewable energy certificates (REC).
