

Red Lantern Photovoltaic Panel

What are coloured solar panels?

With this in mind, more companies are considering the design of their panels and this has led to the introduction of coloured solar panels. Designed to blend in with the colour of your roof (or stand out in some cases) the panels function in the same way as traditional modules but are a more aesthetically pleasing alternative.

Are coloured solar panels more efficient?

Solar panels work by absorbing light from the sun and converting this energy into electricity. Since darker modules reflect less light, they are generally more efficient. But regardless of the colour of your solar panels, the difference in efficiency between standard panels and coloured panels is not overly large.

How do I care for my solar light panels?

Make sure to brush off any dust or snow that might be covering your solar light panels. Keeping them clean helps them soak up light, even on those cloudy days. Illuminate your nights with our solar garden lights collection. Discover the brilliance of outdoor solar lights designed to enhance your garden's charm.

Are coloured solar panels popular in the UK?

This means browns, reds and greys are a popular choice although more vibrant colours like pink and green also exist in the market. Whilst coloured solar panels are not widely encountered in the UK yet, they have taken off in America and parts of Europe where coloured roof tiles are more commonly seen. Do coloured solar panels cost more?

What are the different types of solar powered lighting products?

Our range of solar lighting products include smaller fairy lights and outdoor string lights, stake lights, lampposts and even novelty themed lights. So, if you're looking for a subtle twinkle, or need to illuminate a pathway, then we will have the perfect solar powered lighting solution for you.

Are white solar panels better than black solar panels?

White solar panels can be slightly less efficient than traditional black or blue modules. This variance can also differ between individual colours - with lighter colours in general proving less effective than darker ones. Solar panels work by absorbing light from the sun and converting this energy into electricity.

The word "solar" literally means relating to or determined by the sun, so as the name states, solar lights work with the sun. Without getting too technological, solar panels on lights soak up solar energy with light from the ...
