Could reflect Orbital Be the future?

This is the future that Reflect Orbital imagines is possible. The startup is developing satellites that would deploy large mirrors to precisely reflect sunlight onto specific points on the ground.

Who is reflect Orbital?

Reflect Orbital wants to change that. Semmelhack's journey is just as interesting as the company's mission. An engineer at heart, Semmelhack has been building physical objects since he was a child, from drones in middle school to more complex machines by high school. In 9th grade, he had already started his own drone design business.

Does reflect Orbital sell sunlight after dark?

However,these traits are at the core of Reflect Orbital,an energy startup with a mission so audacious it borders on science fiction: selling sunlight after dark.

Could'reflect orbital' be a space venture?

The potential applications range from lighting up entire cities to providing solar farms with much-needed energy during the night. The journey to secure funding for such an ambitious venture wasn't easy. Reflect Orbital caught the eye of Sequoia Capital, becoming the firm's first space investment since SpaceX in 2020.

Could reflect Orbital replace traditional streetlights with projected sunlight?

Reflect Orbital's satellites could replace traditional streetlights with projected sunlight,Semmelhack told the Review,drastically reducing costs and energy consumption. As for the broader implications of Reflect Orbital's work,Semmelhack sees it as a return to first principles in the energy debate.

What challenges does reflect Orbital face?

Investors struggled to grasp the concept,often questioning the feasibility of reflecting sunlight from space on such a scale. But a viral video demonstration with over two million views showcasing their technology and approach eventually won investors over. Technically,the challenges Reflect Orbital faces are as large as its vision.
