This California-based (of course) startup aims to sell sunlight and energy at night by sending a giant mirror into space, aboard a satellite that can direct the mirror to reflect sunlight onto a ...

Reflect Orbital General Information Description. Developer of solar light reflecting panels designed to provide reflected sunlight at night. The company uses its reflectors in space to shine sunlight on panels at night and to offer sunlight to increase the output of existing infrastructure without additional costs, enabling solar farm owners to generate electricity even after sunset.

According to Reflect's two co-founders, CEO Ben Nowack and CTO Tristan Semmelhack, this extra sunlight could increase the amount of solar power delivered to the electricity grid.

Más información: Ventajas Producción de energía solar nocturna : Permite generar energía incluso durante la noche, extendiendo el tiempo de funcionamiento de los paneles solares.

In a world where Stanford startups increasingly churn out iterations of food delivery apps and poorly disguised duplicates of ChatGPT, original thinking and boundless ambition are rare traits. However, these traits are at the core of Reflect Orbital, an energy startup with a mission so audacious it borders on science
