

Can Senegal achieve universal access to modern energy?

In order to achieve universal access to modern energy, to spur industrialisation and consolidate a low-carbon, resilient and sustainable energy system, Senegal has recently joined the ranks of countries (South Africa, Indonesia, Viet Nam) having entered a Just Energy Transition Partnership (JETP).

Will path transplantation contribute to achieving energy goals in Senegalese?

Still, these large scale projects realized through path transplantation are expected to contribute substantially to meeting the energy goals set by the Senegalese government - the share of renewable energy in the electricity mix to reach 20 % by 2020 and 23 % by 2030 .

What is Senegal's energy policy?

Senegal has actively pursued reform policies in the energy sector, with a strong focus on promoting renewable energy. The current energy policy is reflected in the "Lettre de Développement du Secteur de l'Energie (LPDSE 2008)," a government strategy document building on the lessons learned from previous energy policies.

Is Senegal a good country for energy transitions?

Senegal is a strong advocate for just energy transitions. The country has already met the wind and solar targets it established for 2025 under its most recent Nationally Determined Contribution to the Paris Agreement, and it has joined the Global Methane Pledge to reduce the world's methane emissions 30% from 2020 levels by 2030.

Is Senegal a 'renewable readiness assessment' country?

Senegal hosted the first country Renewable Readiness Assessment pilot study. The Renewables Readiness Assessment in Senegal revealed that many steps have been taken towards liberalising the national electricity market.

Are emerging energy paths in Senegal based on EEG?

This study provides a contribution to fill that gap by exploring the emerging energy paths in Senegal through the lens of EEG, using the framework of regional path creation processes to analyze qualitative interview data from 17 experts in the Senegalese energy sector.

A comprehensive renewable energy supply chain would empower Senegal to undergo an independent energy transition within the electricity sector. It would align with the country's energy policy mix, aimed at ...
