

What is the future of the Marshall Islands electricity system?

The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel generation with renewable energy in the form of wind and solar. Most of all it depends on our people. Take a look at where we are headed.

What is the Marshall Islands electricity roadmap?

The Republic of the Marshall Islands is calling for ambitious action by all countries to reduce greenhouse gas emissions. We are leading the way by committing to net zero emissions by 2050, with significant milestones along the way. The Marshall Islands Electricity Roadmap presents costed, technically sound pathways to help achieve our NDC.

What does the 2009 National Energy Policy mean for the Marshall Islands?

This led to the endorsement of the 2009 National Energy Policy, along with the Energy Action Plan, which aims for "an improved quality of life for the people of the Marshall Islands through clean, reliable, affordable, accessible, environmentally appropriate and sustainable energy services."

What are the main sources of energy in the Marshall Islands?

MEC, KAJUR, the College of the Marshall Islands and the University of the South Pacific, all carry out capacity building in support of energy activities. Most of the primary energy supply (90%) comes from petroleum, with biomass used for cooking accounting for nearly all the rest.

Does the Marshall Islands support the Irena mandate?

The Marshall Islands fully supports the IRENA mandate and will continue to join other countries in our global effort to promote renewable energy. Across the Pacific, small island states face daunting costs for fuel imports and recurrent risk from global oil price volatility.

Why is the Republic of the Marshall Islands reliant on external assistance?

Since independence, the Republic of the Marshall Islands (RMI) has been heavily reliant on external assistance, with grants averaging 60% of gross domestic product (GDP). Like other island nations in the Pacific, the RMI suffers from high and volatile fuel prices while lacking any known fossil fuel reserves of its own.
