

Rental solar panels on roof

Should you lease or rent solar panels?

Leasing or renting solar panels is an increasingly popular option for homeowners who want to take advantage of solar energy without the significant upfront costs of purchasing a system. This approach allows you to benefit from clean, renewable energy while avoiding the responsibilities of system ownership and maintenance.

Can a homebuyer transfer a solar panel lease?

Transfer the lease: If you're moving but don't want to move your panels or purchase the system outright, you can try to transfer the lease to whomever buys your home. However, the homebuyer would have to assume the terms of the lease.

Does a solar lease fit a home?

From a financial standpoint, a solar lease may fit homeowners who meet the following conditions: A solar lease also delegates system maintenance to the provider, although solar panels typically do not require much maintenance beyond regular cleaning.

What is a solar lease?

Solar leases are very similar to power purchase agreements (PPAs). With both options, a solar developer installs and owns the solar panels on your roof. The two differ in how you pay for the solar energy. Solar lease payments are the same every month, whereas solar PPA payments are based on the amount of energy the panels actually produce.

How does a solar installer work?

Typically, a solar installer will work with a separate leasing company to offer a solar lease. The installer is responsible for designing, installing, and maintaining the solar panels. Solar leases are very similar to power purchase agreements (PPAs). With both options, a solar developer installs and owns the solar panels on your roof.

Do you have to pay for a solar lease?

You may have to pay both the monthly lease as well as an energy bill certain months, based on your usage or lower solar energy production. Solar leases are not allowed in every state. How much do solar leases cost?
