

Requirements for installing photovoltaic panels over large areas

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Do I need planning permission to install a solar PV system?

This amendment classifies the installation of a residential solar PV or solar thermal system as 'permitted development' meaning planning permission is not required before work commences assuming that the installation fulfills the following conditions:

Do solar panels need planning permission?

The solar PV array must not face onto or be visible from the highway if located within a conservation area or a world heritage site. Ground mounted systems of greater than 9m sq (4-5 large solar panels) will require planning permission.

When did solar panels become a building regulation?

In 2005, household electrical work was absorbed into the UK government's official Building Regulations. A year later, the Climate Change and Sustainable Energy Act 2006 brought microgeneration systems like solar panels under the umbrella of the Building Regulations. Should you receive a building regulations certificate for your solar panels?

Can a solar panel be installed on a roof?

If you wish to install a solar panel on your roof building regulations will normally apply. The ability of the existing roof to carry the load (weight) of the panel will need to be checked and proven. Some strengthening work may be needed. Building regulations also apply to other aspects of the work such as electrical installation.

First, the Solar Access Roof Areas (SARA) must first be determined. SARA is the area of the building's roof structure capable of supporting a PV system, having adequate solar access (not too much ...
