

Residential solar power generation application

Can PG&E help you install and manage your solar energy system?

Let PG&E help you install and manage your solar energy system. Why? You can reduce your monthly bill and your carbon footprint. PG&E offers a range of incentives to help you adopt clean energy systems.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

Can a solar company energize a customer's PV system?

Upon receiving Permission to Operate from TEP, the solar company may energize the customer's PV system. Solar companies are responsible for designing a PV system tailored to the customer's home and energy needs, and calculating its size, configuration and energy production.

When will SCE provide authorization to operate my solar system?

SCE will provide authorization to operate the solar system once proper installation and permitting are completed. Once your solar system is installed and you have been given the authorization to operate your solar system, you will be interconnected with our electric grid.

Do you qualify for a free home solar system?

Homeowners may qualify for a free home solar system from our partner, GRID Alternatives. Find out if the Disadvantaged Communities - Single-family Solar Homes (DAC-SASH) program, a state of California program for low or fixed-income families, can help you. Your home must be in a DAC to qualify. Learn more [Do You Rent and Still Want Solar?](#)

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

Most solar panel installations throughout the U.S. are connected to the grid. With grid-tied systems, you can draw power from the power grid when your solar panel system isn't producing electricity. Additionally, you can ...
