

## Who is rezolv energy?

Rezolv is a highly experienced, independent renewable energy producer. © 2024 Rezolv Energy. All rights reserved. Rezolv is a highly experienced, independent renewable energy producer building a multi-gigawatt portfolio including wind, solar and battery storage that delivers clean energy across Central and South Eastern Europe.

## What is resolv & how does it work?

Rezolv aims to build a multi-gigawatt portfolio of wind,solar and energy storage. This will help companies and countries across the region meet their energy needs in response to energy security challenges and climate policies. It will take renewable energy projects from late-stage development through construction and into long-term operation.

## Why is rezolv investing in Europe's largest solar photovoltaic plant?

At a time when energy security needs are driving faster adoption of renewable energy, we are excited to be funding Rezolv's investment in Europe's largest ever solar photovoltaic plant, expected to provide clean power to more than 370,000 households and constructed and operated to the highest sustainability standards.

## What is Actis resolv energy?

In July 2022, Actis announced the launch of Rezolv Energy, an independent clean energy power producer, established to build a new era of sustainable power in Central and South Eastern Europe.

Will rezolv be able to build a wind power plant?

At launch, Rezolv has signed agreements to acquire development rights to two wind projects in the Central and South Eastern Europe region, with a combined capacity of 1GW. Construction contracts are expected to be awarded early next year, with the projects expected to be operational by 2025-26.

## What makes rezolv energy unique?

We already have over 2GW of clean energy being prepared for construction across across four sites in Romania and Bulgaria, and a strong pipeline of projects in development across several countries. At Rezolv Energy our values are the essence of our identity, guiding our actions and driving our commitment to a clean energy future.
