

Romania ads tec energy

Who is ads-TEC energy?

ADS-TEC Energy develops and produces such intelligent platforms completely in-house and is therefore a long-term partner for all future energy companies that design locally optimised business models on our platforms.

Why should you choose ads-TEC energy?

We offer solutions in times of energy transition: long-term, secure, profitable- We empower your business. ADS-TEC Energy has more than ten years of experience with lithium-ion technologies, storage solutions and ultra-fast charging systems, including the corresponding energy management systems.

Is ads-TEC energy ready for a global expansion?

With hundreds of battery buffered ChargeBox platforms already delivered, and with existing certifications in both US and European markets, ADS-TEC Energy is well-positioned for rapid expansion globally as the need for ultrafast charging capabilities increases with the transition to an all-electric economy.

Will ads-TEC energy be listed on the NASDAQ?

Upon the closing of the transaction the combined entity will be named ADS-TEC Energy and remain listed on the Nasdaq Capital Market.

What can ads-TEC do for You?

ADS-TEC's globally scalable and powerful storage solutions and energy management platforms provide solutions that can enable that transition. Specifically, ADS-TEC platforms can bring access to rapid charging capabilities to new markets and help overcome existing barriers to expanding the utilization of electric vehicles and reducing emissions.

Why did Bosch acquire a stake in ads-TEC energy?

In the further course of the company's development, BOSCH had acquired a stake in ADS-TEC Energy. Later, ADS-TEC Energy became a supplier and partner for new infrastructures on an international scale of the leading e-mobility providers through a major contract for battery-buffered fast charging systems.

ADS-TEC Energy develops and produces battery-based platform solutions for the energy industry of the future. Our systems are complemented with comprehensive services and secure remote access to all operational data, enabling long-lasting and long-term operation. This way, we ensure that the future decentralized energy system in a CO₂-neutral ...

| ADS-TEC Energy has more than ten years of experience with lithium-ion technologies, storage solutions and ultra-fast charging systems, including the corresponding energy management systems. The battery-supported fast-charging technology enables electric vehicles to be charged ultra-fast, even at power-limited grid

connections.

ADS-TEC claimed the project is the most powerful modular large-scale storage solution in Sweden, though the announcement didn't specifically say it had entered commercial operation. There would typically be a gap of a few months between physical installation of BESS units and full commercial operation to allow for testing and commissioning.

When it comes to powering your dealership operations, ADS-TEC Energy stands as the definitive choice. Our cutting-edge solution, meticulously engineered in Germany, not only promises to future-proof your charging needs but has also been rigorously field-tested and proven successful in over 500 auto dealerships, boasting impressive >97% up-time rates.

ADS-TEC Energy-Lösungen und -Services geben Paragon die Flexibilität, mehr als nur Elektrofahrzeuge zu laden. Das Unternehmen nutzt ChargPost bereits für Busse. Andere Kunden nutzen ChargeBox ...

ADS-TEC Energy is a global leader in battery-buffered, ultra-fast charging technology, offering energy storage and management platforms that address the current electric vehicle (EV) bottleneck presented by low-to-medium power level grids. With customizable platforms serving the electric vehicle, commercial and industrial sectors, ADS-TEC ...

ADS-TEC Energy nutzt die von Porsche Engineering entwickelten HPC bis heute für seine „ChargeBox“ - also eine Pufferbatterie, die mit Wechselstrom aus dem Netz langsam geladen wird und die gespeicherte Energie schnell über die Porsche-Ladesäule an die angeschlossenen Fahrzeuge abgeben kann. Damit werden Schnelllade-Stationen auch an ...

Und das ohne Netzausbau! Mit den batteriebasierten Ladelösungen von ADS-TEC Energy gewähren Sie nicht nur, dass Ihre Unternehmensflotte stets ultraschnell und zuverlässig geladen ist, sondern auch, dass dies auf wirtschaftlichste und flexibelste Weise geschieht. Nutzen Sie die aktuellen Förderungen.

Die Systemlösung für batteriegepuffertes Ultra-Schnellladen mit bis zu 320 kW Ladeleistung von ADS-TEC Energy bietet höchste Flexibilität. Die ChargeBox ist die kompakteste und effizienteste Lösung ihrer Klasse. Durch die verschiedensten Platzierungsmöglichkeiten der Systemkomponenten können bis zu 300 Meter zwischen Netzanschluss und ...

Bosch Thermotechnology will acquire a stake in Ads-Tec Energy, the energy storage system-making subsidiary of Stuttgart-headquartered Ads-Tec, which produces industrial IT systems. Following the signing of an ...

Einen Überblick über die Ladelösungen von ADS-TEC Energy erhalten Sie in unserer

Brochüre. Wie funktioniert ultraschnelles Laden am leistungsbegrenzten Netz? Den Unterschied macht unser integrierter Batteriespeicher. Dieser wird mit der Leistung des bestehenden Netzes geladen und speichert diese für den bevorstehenden Ladevorgang.

Entdecken Sie unsere innovative Lösung für das Aufladen von Elektrofahrzeugen in Marina Palms, betrieben von ADS-TEC Energy. Mit 468 Wohneinheiten, verteilt auf zwei Türme in North Miami Beach, ist Marina Palms eine florierende Gemeinde mit einem wachsenden Bedarf an ...

NÜRTINGEN, Germany, October 22, 2024--ADS-TEC Energy (NASDAQ: ADSE), a global leader in battery-buffered fast charging systems, today announced that it has signed a partnership with Paragon ...

With the battery-buffered ChargePost ultra-fast charging station, ADS-TEC Energy offers a charging capacity of up to 300kW even if the power grid does not provide the desired power. Discover our ChargePost all-in-one system now - and join us ...

ADS-TEC claimed the project is the most powerful modular large-scale storage solution in Sweden, though the announcement didn't specifically say it had entered commercial operation. There would typically be ...

ADS-TEC Energy, ein Spezialist für batteriegestützte Schnellladesysteme, konnte Mitte der Woche einen bedeutenden Geschäftserfolg verzeichnen. Das Unternehmen gab bekannt, dass es Aufträge im Gesamtwert von über 100 Millionen Euro erhalten hat.
