

Who produces electricity in Romania?

Electric power was provided by the Romanian Electric Power Corporation (CONEL). Energy sources used in electric power generation consisted primarily of nuclear, coal, oil, and liquefied natural gas (LNG). The country has two nuclear reactors, located at Cernavodă, generating about 18-20% of the country's electricity production.

How much investment does Romania need to achieve the energy strategy?

Investment needs to achieve the objectives of the Romanian Energy Strategy are estimated as EUR 127 billion overall from 2021 to 2030 (annually around 6% of current GDP), mostly in energy demand sectors. The use of Union level funding sources such as cohesion policy or the Modernisation Fund is not yet specified.

What is energy in Romania?

Energy in Romania describes energy and electricity production, consumption and import in Romania. Romania has significant oil and gas reserves, substantial coal deposits and it has considerable installed hydroelectric power. However, Romania imports oil and gas from Russia and other countries.

Will Romania achieve a decarbonised energy sector by 2040?

In contrast, the investments outlined in Romania's National Energy and Climate Plan (NECP) do not ensure a decarbonised energy sector by 2040. The Romanian power sector would emit 9.2 MtCO<sub>2</sub> in 2030 (which can be halved in a lower-gas scenario) and 3.5 MtCO<sub>2</sub> in 2040, at slightly higher wholesale electricity prices.

What will Romania do by 2020?

By 2020, the objective of Romania is to guarantee the efficient operation of its energy system under security conditions. Romania also plans to meet the obligations set by EU in terms of greenhouse gas emissions through its legislative package "Climate changes - renewable energies".

What type of power does Romania have?

Electric power in Romania is dominated by government enterprises, although privately operated coal mines and oil refineries also existed. Accordingly, Romania placed an increasingly heavy emphasis on developing nuclear power generation. Electric power was provided by the Romanian Electric Power Corporation (CONEL).

2 ???&#0183; Moldova, Romania's small eastern neighbor, is set to declare a state of emergency in the energy sector for 60 days, starting December 16, 2024. The announcement was made by prime minister Dorin ...
